the seventh book of pappus's collection his commentary on the *Collection* or *Treasury of Analysis* figures prominently in the history of both ancient and modern mathematics as our chief source of information concerning several lost works of the greek geometers euclid and apollonius and as a book that inspired later mathematicians among them viete newton and chasles to original discoveries in their pursuit of the lost science of antiquity this presentation of it is concerned solely with recovering what can be learned from pappus about greek mathematics the main part of it comprises a new edition of book 7 a literal translation and a commentary on textual historical and mathematical aspects of the book it proved to be convenient to divide the commentary into two parts the notes to the text and translation and essays about the lost works that pappus discusses the first function of an edition of this kind is not to expose new discoveries but to present a reliable text and

organize the accumulated knowledge about it for the reader's convenience nevertheless there are novelties here the text is based on a fresh transcription of vat gr 218 the archetype of all extant manuscripts and in it i have adopted numerous readings on manuscript authority or by emendation that differ from those of the old edition of hultsch moreover many difficult parts of the work have received little or no commentary hitherto

volume 1 35 works volume 36 37 letters volume 38 provides an extensive bibliography of ruskin's writings and a catalogue of his drawings with corrections to earlier volumes in george allen's library edition of the works of john ruskin volume 39 general index

includes university catalogues president's report financial report etc
